Patented 3D rotation

Gene Café's unique mixing rotation system features off-axis rotation to ensure even distribution of the beans and better heat circulation during the roasting process.

Removable bisected roasting chamber

The divided roasting chamber efficiently distributes the beans as they roast. Ensuring even heat flow and efficient cooling. Gene Café roasters come with a chamber stand to safely and securely hold the chamber upright for convenient filling and cleaning.

High efficiency chaff removal

Perforations in the roasting chamber divider panel help to gently remove chaff, a thin membrane surrounding the bean, and whisk it away into a spacious collection chamber that is easy to detach and empty.

Fast response heat control

A simple dial provides precise control over the nickel chrome coil heater for accurate roasting temperature while an LED display shows both the set and actual temperatures.

Dynamic roasting and cooling

A second control knob makes it a snap to change the roasting cycle time on the fly. Manually switching from roasting to cooling is as easy as pressing a button. Digital displays show roasting time and cooling status.

Automatic cooling function

The Gene Café automatically switches from roasting to cooling, and temperature sensors control the cooling process. An audible tone lets you know when the cooling cycle has completed.

Cybernetic sensor safety system

In the event that the Gene Café's roasting temperature exceeds a preset upper limit, the heater will automatically shut off.

Full range roasting

Gene Café can roast beans to any of the eight roast levels commonly referred to by coffee roasting professionals: Light, Cinnamon, Medium, High, City, Full City, French and Italian.

At home on the kitchen counter

Sleek Eurostyle design and a small footprint make the Gene Café an attractive addition to any kitchen or showroom.

Clear roasting chamber and safety cover

Being able to see the beans during roasting makes it easy to tell when you want to make time or temperature changes on the fly. The hinged safety cover helps to isolate the roasting chamber.
